

# TURFACE SLIDEMASTER™

## TURFACE SLIDEMASTER™ AN ALL-AROUND PERFORMER

A new premier topdressing solution from Surface Athletics! Surface SlideMaster™ is specially formulated with consistent sub-angular particles that provide the ultimate sliding surface for skinned infields! The particles let water pass through to the infield skin, helping improve water management especially in hot or dry weather.

Surface SlideMaster™ is an expanded shale that can be used as a stand-alone topdressing or can be combined with industry-leading Surface calcined clays to allow you to better manage playing conditions and surface moisture. Take the next step in your field management routine by adding Surface SlideMaster™ to your lineup.

### Natural Red Color - Big Style, Zero Stains

- All-natural color stands out but won't stain uniforms
- Blends well with popular Surface Elite Heritage Red® and Surface Elite Champion Brown®
- Generates excellent ball visibility and a sharp, professional look

### Superior Particles

- Cleanest, most uniform particle screening of any vitrified clay or shale product – consistent with the sizing of Surface's industry leading Pro League® conditioners
- Sub-angular particles create the ultimate sliding surface with less abrasion
- An extremely durable topdressing that helps lower your upkeep costs

### Improves Water Management in Dry Conditions

- Particle design allows water to quickly penetrate to the infield skin for deeper saturation
- Can be combined with Surface calcined clay for optimum moisture management, especially in summer months

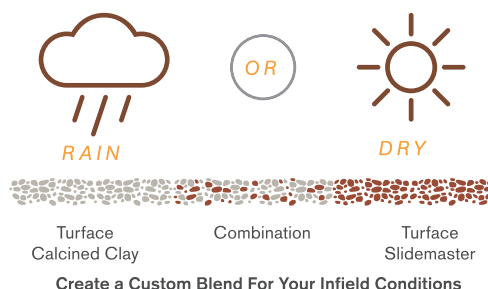

### Easier Field Prep

- Particles flow easily through drags and screens
- Spreads uniformly, with minimal fines or dust in the bag
- Creates a smooth, professional finished surface

## THE ULTIMATE SLIDING SURFACE

### Moisture Management

Surface's calcined clay conditioners provide an unrivaled level of absorption to manage moisture and prevent rainouts in inclement conditions. Surface SlideMaster™ works in concert with Surface calcined infield conditioners to allow water to move through the topdressing layer more quickly, saturating the infield mix when conditions are hot and dry.

## ADDITIONAL PRODUCTS FROM TURFACE

### TURFACE® ELITE™ THE #1 CONDITIONER

- Smaller, more uniform particles assure a smooth, professional, skinned playing surface, minimizing potentially dangerous bad hops
- Moisture-absorbing properties improve footing and help to prevent rainouts
- Available in Natural (tan), Champion Brown, Red and Heritage Red to enhance visibility and ballpark aesthetics

### MVP® INFIELD CONDITIONER

ON MORE DIAMONDS THAN ANY OTHER

- Maintain a smooth, cushioned, playable surface for superior traction and player safety
- Absorb excess moisture and improve drainage as a result of balanced air and water pore space
- Fight infield compaction that leads to running, sliding and bad ball hop injuries
- Ideal for new infield construction or renovation

### SAF™ 5-STAR PACKING CLAY

ALL NEW!

- Ready to use right out of the bag
- Excellent durability, holds up game after game
- Used at all levels of play from coast to coast
- Easy installation
- High Density red clay material binds well

### TURFACE PROFESSIONAL MOUND CLAY™

PREMIER, 100% VIRGIN CLAY

- Preferred by professional and college teams
- Available as a shredded clay or in pre-formed blocks
- Easy installation – ready right out of the bag
- High level of durability in a range of climates, to reduce wear across a variety of fields

### MARMOUND® ALL-PURPOSE PACKING CLAY®

AN AFFORDABLE SAND/CLAY MIXTURE

- Helps maintain moisture and firm up soft, sandy areas for safe footing and consistent play
- Easy-to-use material for fast installation and smooth shaping
- Saves time and reduces the amount of field care needed
- Outperforms other clays in its class
- Great for multiplexes – holds up over a series of games and fields

## IN THE GROUND

Incorporating Turface® into the soil of your natural grass fields reduces compaction and improves water- and air-holding capacity at the root zone.

## ON THE GROUND

Improve field safety, stimulate recovery and absorb excess moisture by adding Turface to water-soaked fields.

## BY YOUR SIDE

The Turface network of professionals can help you every step of the way, with information and tips on products, procedures and best practices
