

**YOUR HOME
FIELD ADVANTAGE**

For over 50 years, more groundskeepers have trusted Turface Athletics™ for superior products and sound advice.

Turface® TrackPro™

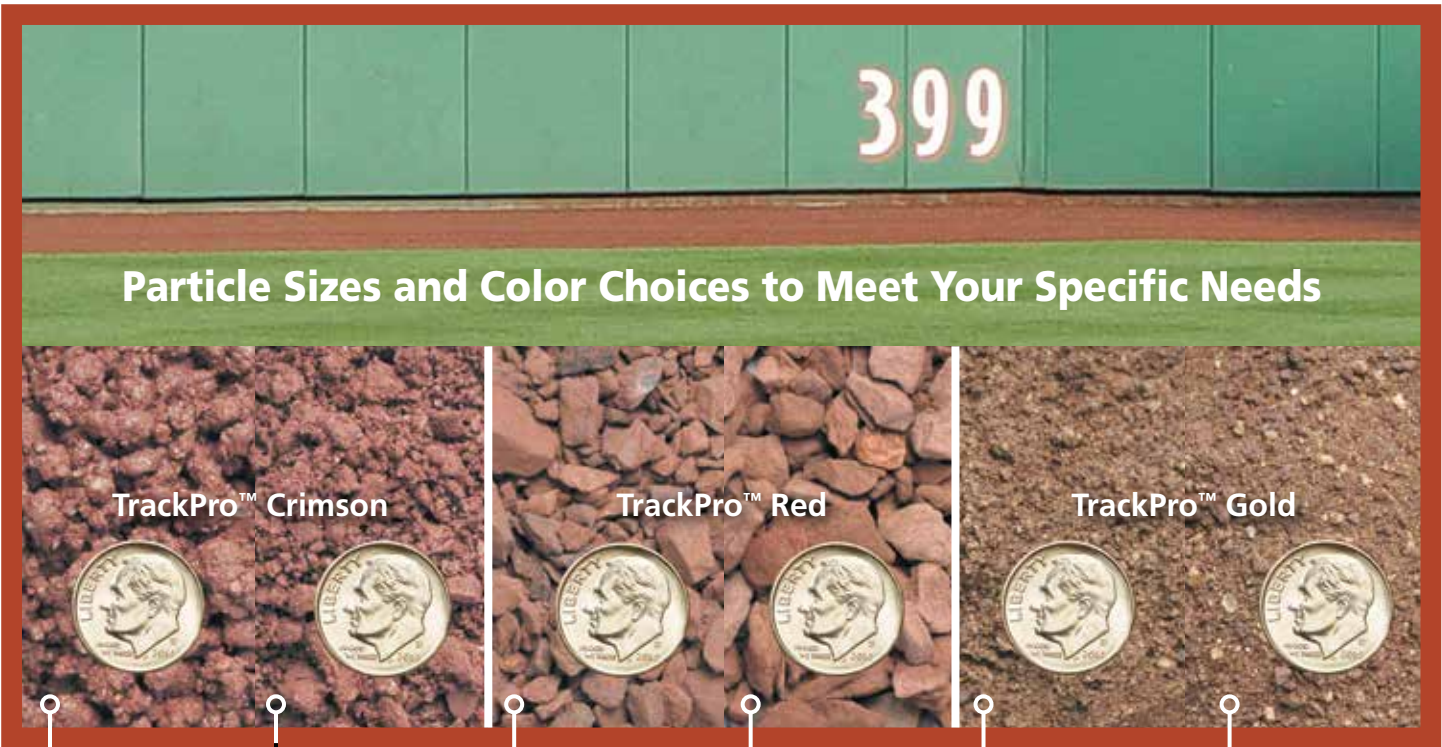

Warning Track Aggregates — Specially Blended for Safety and Performance

Turface Athletics™ is the industry leader in providing infield conditioners that are proven to be the most effective for managing moisture and creating a safer playing surface. Turface® TrackPro™ brings this tradition of trusted performance to the outfield warning track with consistently sized aggregate particles specifically designed for:

- Aesthetically pleasing appearance
- Superior drainage
- Firm surface without compaction
- Stable footing for enhanced playability

Athletes at every level of play will benefit from the advantages Turface TrackPro delivers each time they take the field. You benefit, too, because this product makes it easier to find the best product for your management preferences and budget.

Particle Sizes and Color Choices to Meet Your Specific Needs

TrackPro™ Crimson

Turface® TrackPro™

An Ideal Solution to Manage Moisture and Improve Footing

Economics and Logistics

Maximize your savings by selecting the products and shipping location nearest you.

Shipping and Application. Turface® TrackPro™ is available in 2,000-pound sacks or bulk truckloads. To optimize product performance, read and follow application guidelines available at Turface.com.

From Warning Tracks to Walking Paths

Turface TrackPro provides a solution in areas where standing water and mud are reoccurring problems. Install this beautiful aggregate on any area with high foot traffic where you want a consistent surface, better drainage, compaction resistance and enhanced aesthetics:

- In front of dugouts
- Walkways between diamonds
- Landscape paths
- Driveways

More Ways to Bring Home Safer, More Playable Fields

Turface® MVP® with its larger particle size is excellent for incorporating into an infield mix, or as a topdressing to create a consistent and level playing surface, to help prevent rainouts, and to improve native soil for turf renovations.

Turface® Pro League® is the #1 infield conditioner. Smaller, more uniform particles assure a smooth, professional, skinned playing surface, minimizing potentially dangerous bad hops, and moisture-absorbing properties to improve footing and help prevent rainouts. Available in four colors to coordinate or contrast with the Turface® TrackPro™ choices you make.
